I. PB5000 Hardware Installation

1. Power on Layer 2/3 Managed/Smart Gigabit Switch and enable **IGMP Snooping v2** and **Jumbo Frame (8Kb at least)** function.
2. Be sure the IGMP and Jumbo Frame setting have been saved before reboot Ethernet switch.
3. Connect all Senders and Receivers to Gigabit Switch by Cat5e/6 cables, and connect to video source and TV/Display with HDMI cables.
4. [optional] Connect IR emitter cables & IR Receiver cables to Sender/Receiver's IR Emitter/Receiver Jack. IR emitter cable to IR emitter jack, IR receiver cable to IR receiver jack. And, point IR emitter head of IR emitter cable to device IR receiver window, IR receiver head of IR receiver cable to IR remote location and keep clear line of sight in between.
Notice! PB5000-S+E and PB5000-R+E got one way IP pass-thru only. PB5000HD-S+E sender don't provide IR pass-thru compatibility with PB5000-R+E.
5. [optional] Connect RS232 cables between PC/controller to Senders, TV/Displays to Receivers.
6. Plug-in DC power adapter to all Senders and Receivers. Units power on.
If PoE switch or PoE injector connected, then no need to plug-in DC power adapter.
7. Power on all Video Sources and start playing video.

II. Ethernet Switch Setting

1. Please select Layer 2/3 managed switch to work with Aavara 4K Over IP.
2. Enable IGMP Snooping (Version 2), and all sender/receivers are in same VLAN group.
3. Enable Jumbo Frame (at least 8Kb) on all ethernet switches.
4. Enable IGMP Querier on major switch and disable Fast Leave on all switches, If multiple ethernet switches installed.
If be sure network bandwidth between switches enough for video network, can use Fiber connection or set **802.3ad Port Trunking/Link Aggregation** to increase bandwidth between switches.
5. If Ethernet switch is also use for other service like PC network or Voice Over IP:
 - Set different VLAN groups to divide different network service.
 - For RJ45 ports or Fiber ports used for other services, set **IGMP Blocked** (HP switch) or **Multicast Forward Forbidden** (Cisco switch), to avoid video streaming data affect.
6. Be sure save above setting before reboot ethernet switch.

III. Integrate with 3rd Party Controller

PB9000 support following major 3rd party controllers integration:

- Control 4, AMX, Crestron, RTI, Elan g!, QSC, Neets and more.

Aavara provide controller driver allow 3rd part controller can control Aavara HDMI Over IP sender and receiver by IP command directly.

Please check Aavara representative or your distributor for 3rd party driver and user instruction.

IV. IP Setting, Web Configuration & Control

A. To Know IP address of Aavara HDMI Over IP Sender and Receiver

Aavara HDMI Over IP sender and receiver got factory default IP within 169.254.xxx.xxx C class range, and netmask 255.255.0.0, IP address of each HDMI Over IP unit can be found by following way:

Unit IP Show On Screen OSD:

1. To set up a sender connect to a receiver by Cat5e cables (can be with or without Ethernet switch in between).
2. receiver connect to a TV or Display with a HDMI cable.
3. Power on Sender, Receiver and TV/Display.
4. On right bottom of screen, it will show:
 - Local IP Receiver IP address
 - Remote IP Sender IP address
5. Then, please connect the sender to a PC/Notebook RJ45 port with a Cat5e cable. And, power on.
6. To set PC/Notebook RJ45 port IP configuration as follow:
 - IP address: 169.254.0.100 (or any IP within 169.254.xxx.xxx range)
 - Netmask: 255.255.0.0

Or

Finding unit and IP in Bonjour Browser

Software Required:

1. **Apple Bonjour SDK** free download from Appple SDK web site, if you are using MS windows OS PC/NB. Apple MacPro or MacBook which don't need it, had built-in OS X.
 - can download from Apple developer web site
2. **Bonjour Browser** for easy find out all senders and receivers on network.
 - Just google and download from Internet
1. To set PC/Notebook RJ45 port IP configuration as follow:
 - IP address: 169.254.0.100 (or any IP within 169.254.xxx.xxx range)
 - Netmask: 255.255.0.0
2. Setup all Cat5e cable connection between PC/Notebook, sender, receiver and Ethernet switch, then power on.
3. [optional] Install Apple Bonjour SDK on your MS Windows PC/Notebook.
4. Launch Bonjour Browser and check HTTP service section. All Aavara HDMI Over IP sender and receiver can be found at following domain name:
 - Sender Aavara-gateway0000.local 0000 represent video channel number
 - Receiver Aavara-clientAAAAAAAAAAAA AAAAAAAAAAAAA represent MAC address of receiver

B. Launch AV Master Control Web page

[http://\[unit ip\]/cfg.html](http://[unit ip]/cfg.html) Unit configuration web page (needed only when you want to change unit IP)

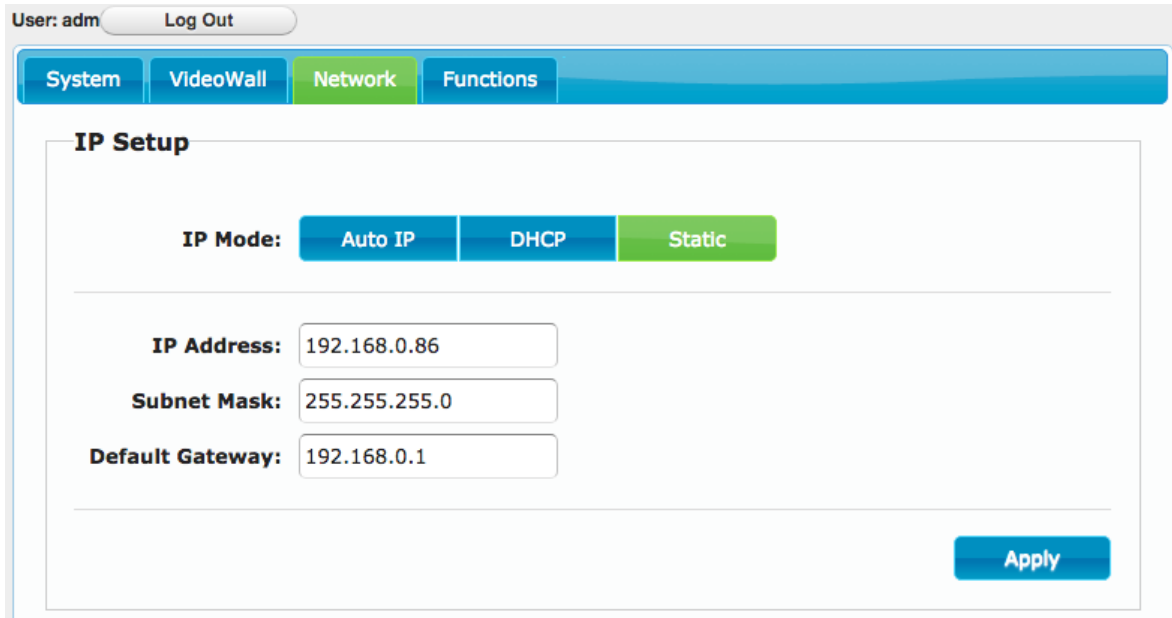

[http://\[unit ip\]/index.html](http://[unit ip]/index.html) Aavara AV Master /Control web page

C. Change IP address of Sender and Receiver

Aavara HDMI Over IP sender and receiver have factory default IP within 169.254.xxx.xxx C class range, and netmask 255.255.0.0. Recommend to set static IP to each box. IP address of each HDMI Over IP unit can be changed by following way:

1. Launch Web browser with following URL, the Unit Web page will show:

http://[unit ip]/cfg.html

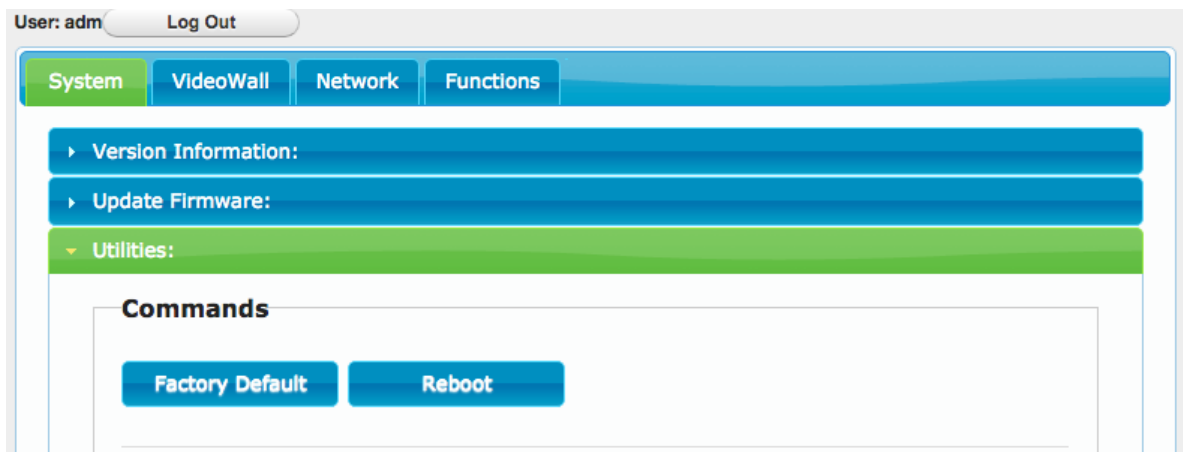

3. Change IP Mode to Static

- IP Address: Please assign a IP with correct format. (Ensure unites' IP are at C or D class range).
- Subnet Mask: 255.255.0.0 or base on proper ethernet network planning.
- Default Gateway: Only if need, please refer gateway setting on Router.

4. Click Apply Button to save new setting, but unit need to reboot to get new setting effect.

5. Click System Tab → Utilities → Click Reboot button, reboot.

V. Aavara AV Master Web Interface

Aavara AV Master Web interface, built-in in every Aavara HDMI Over IP unit, is a single web page setup and control entire HDMI Over IP AV Matrix and Video Wall. It will only need to configure and operate Aavara AV Master Web Interface on One unit then that unit will become master control unit of entire system, usually recommend to use first sender, then all rest of units just take order.

To Connect Aavara AV Master Web Interface via PC/Tablet, please connect to same ethernet Switch/Wifi AP with following IP setting:

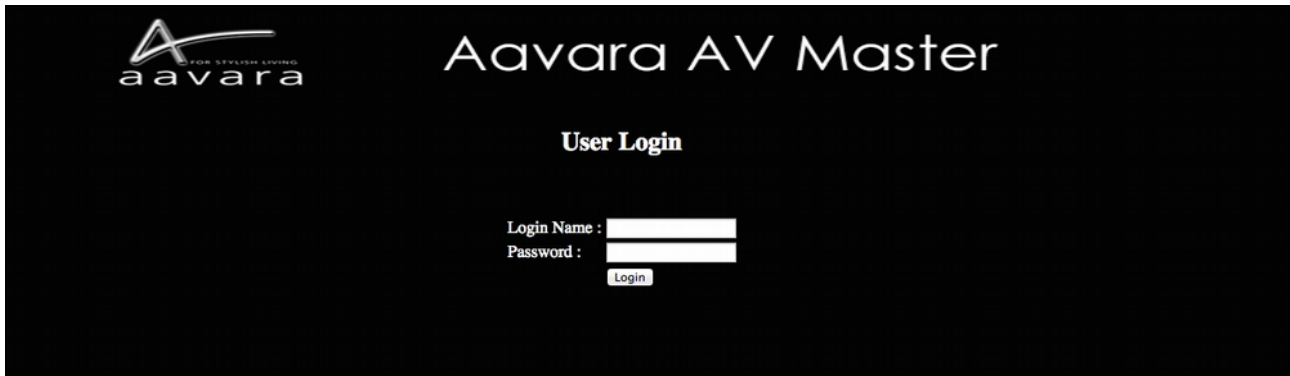

- IP address: any no conflict IP within same C or D class IP range with all senders and receivers.
- Netmask: 255.255.0.0 or value base network configuration that allow all unites can see each other.
Factory default IP range is 169.254.xxx.xxx netmask 255.255.0.0
- Web browser: recommend Google Chrome, Firefox, Safari

Launch Web browser with following URL (domain name of sender at channel 0, default sender setting):

<http://aavara-gateway0000.local>

A. User Login

Every time launch web browser and Aavara AV Master Web page will ask user to login.

System Default Login name and Password (Can be revised or delete later on at User Management Tab) with Administrator authorization.

Login name: adm
Password: adm

After Login, on right top corner will show Login User info and Logout button.

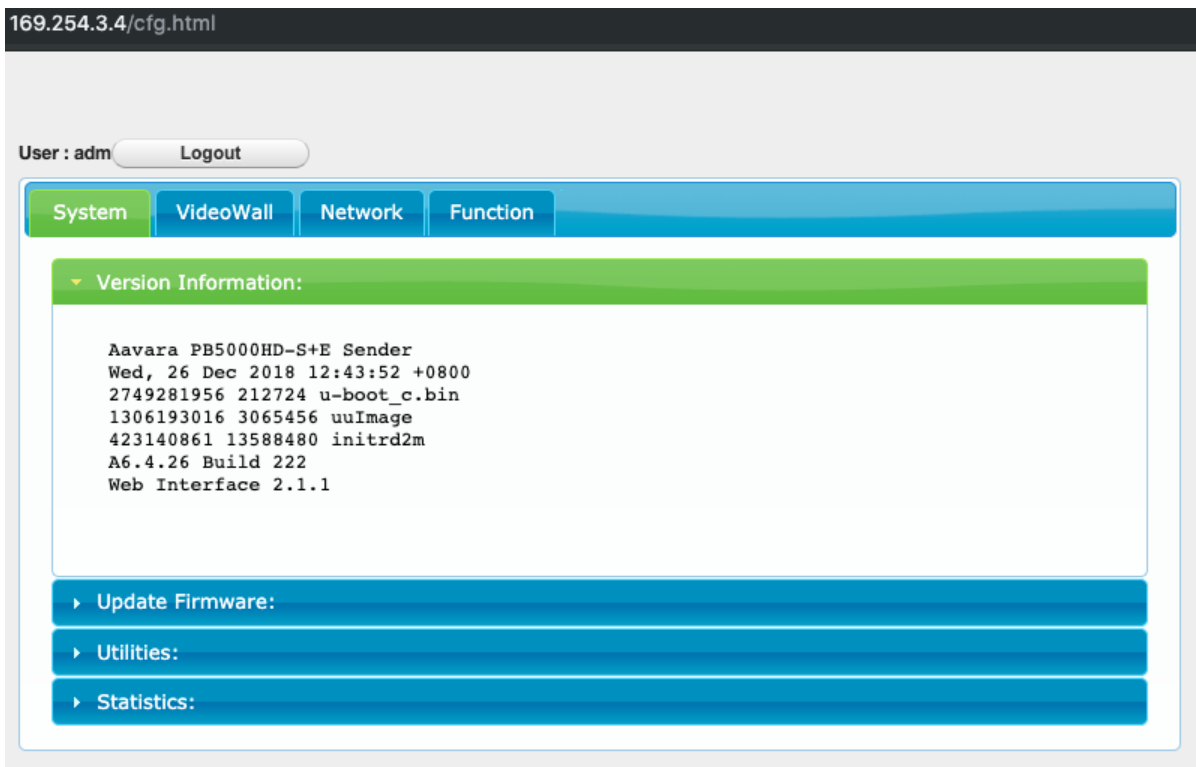

User with **Administrator** authorization will see both AV Matrix/VideoWall/Control Operation and All Setup functions.

User with **Operator** authorization will see AV Matrix/VideoWall Operation functions only.

Only User with **Administrator** Authorization allow to access unit configuration `cfg.html`

Access other units' web page other than master control unit, will redirect web page/URL to master control unit's web page.

Once User Session expired, AV Master Web Interface will ask user to login again.

B. Setup within AV Master Web Interface

Click on Setup Tab on first time installation and configuration change later on, wait few seconds, AV Master will scan and list all Senders and Receivers. Please configure all parameters for Senders and Receivers, detail at table below, according installation & operation requirement. All settings will storage in this Sender or Receiver only and later on operation shall connect to this Sender/Receiver's web page only.

If any RS232 setting changed, the unit will need to reboot to get new setting effect.

For Device Control Command code setup, need to do by CSV file uploading way as next section show.

Setup

Video Source / Sender Setup:

Channel	IP	Group	Codename	Reset EDID	Audio Input Select	Device Control ID	RS232 Mode	RS232 Baudrate
1	169.254.0.10	0	Nvidia Shield	<input type="checkbox"/>	Auto Detect	0	Pass-Thru	115200
2	169.254.0.11	0	MacBook	<input type="checkbox"/>	Auto Detect	0	Pass-Thru	115200

Apply

Display / Receiver Setup:

ID	IP	Group	Codename	HDR 3D Surround	Device Control ID	Rs232 Mode	RS232 Baudrate
1	169.254.0.12	MeetingRoom A	TV1	<input type="checkbox"/>	0	Pass-Thru	115200
2	169.254.0.13	Living Room TV	TV2	<input type="checkbox"/>	0	Pass-Thru	115200

Apply

Video Source/Sender:

Field	Description
Channel	Range 1 ~ 9999, Auto assign or manual change, Each sender must have Unique Channel Number assign. No two or more Senders got same channel number.
IP	IP Address (Auto assign, or go Unit cfg.html for static IP assign)
Group	Sender's Group name for further management requirement.
Codename	Sender's Codename / Video Source name for further operation required.
Reset EDID	Reset Sender EDID table to factory default
Audio Input Select	Select Audio Source from HDMI or Analog Audio Input
Device Control ID	Match Device ID in Device Control CSV File (control by CEC(HDMI)/IR/RS232)
RS232 Mode	IP Command Rs232 command issue by IP command Pass-Thru RS232 command pass-thru between sender and receiver rs232 ports
RS232 Baudrate	Assign RS232 Baudrate , range 115,200 ~ 300 bps

Display/Receiver:

Field	Description
ID	Auto or Manual Assign, Each Receiver must have Unique ID Number assign. No two or more Receivers got same ID number.
IP	IP Address (Auto assign, or go Unit cfg.html for static IP assign)
Group	Receiver's Group name for further management requirement.
Codename	Receiver's Codename / Display name for further operation required.
HDR/3D/Surround	Enable (checked) / Disable (uncheck) EDID Copy to support HDR, 3D and Surround Sound output (LPCM/Dolby/DTS)
Device Control ID	Match Device ID in Device Control CSV File (control by RS232)
RS232 Mode	IP Command Rs232 command issue by IP command Pass-Thru RS232 command pass-thru between sender and receiver rs232 ports
RS232 Baudrate	Assign RS232 Baudrate , range 115,200 ~ 300 bps

Notice!

1. Please wait for few sec. AV Master will search all senders and receivers on network.
2. Each Sender must assign a unique video channel (CH) number, NO two senders will have same number.
3. Group name and Codename can use English, French, Latin, German, Chinese and Japanese fonts, but it won't able to show on OSD. Use underscores instead of spaces for the Group name and Codename fields.
4. If USB & RS232 setting changed, the unit will auto reboot to get new settings effect.
5. If any of HDMI device connect to Sender or Receiver not support 3D or Multichannel audio, recommend to keep 3D Video & Surround option off to speed up video channel switching and maximum EDID compatibility.

C. Setup & Backup by CSV files

Setup by CSV Files

1. Please set static IP on every each unites, at each units' cfg.html, refer IP setting section for more detail.
2. Login user with Administrator authorization.
3. Refer following CSV files detail to plan and edit in Spreadsheet application. Then, save at CSV file format (divide field by a comma.)
4. Upload CSV files one by one.
5. Press button Updating all other unites. This step will take long time to update if large scale matrix/VideoWall installed, please be patient.
6. Reboot all unites after CSV files uploaded and all units updated.

Backup by CSV Files

1. Click Backup Current Setting Button. AV Master will collect all setting and convert into CSV files. Web Page will show Sender/Receiver/Control Download CSV file URLs.
2. Click the URL to download current CSV files.

Replace AV Master Master Control Unit

1. Get a new unit of sender or receiver.
2. Change IP setting to be same as the old Master Control Unit, refer IP setting section for more detail.
3. Upload Sender/Receiver/Device Control CSV Files
4. The unit is ready to replace the old Master Control Unit.

The screenshot displays the Aavara AV Master web interface. At the top, the logo for Aavara is on the left, and the text 'Aavara AV Master' is in the center. On the right, it shows 'Administrator adm' and a 'Log Out' button. Below the header is a navigation menu with tabs: Multicast, Matrix, Multicast Group, VideoWall, Control, Setup, Setup & Backup by CSV (which is highlighted), and VideoWall Setup. Underneath this is a sub-menu with 'Video By Channel', 'Device IR Command Learning', and 'User Management'. The main content area has the title 'Setup & Backup by CSV Files'. It is divided into two sections: 'Step 1: Upload Senders & Receivers Setup CSV file and update this unit.' and 'Step 2: Update New Setup setting to All Other Units.' Step 1 includes three rows, each with a 'Choose File' button, the text 'No file chosen', and an 'Upload' button. Step 2 includes a warning 'This step will take long time! Please wait!' and two buttons: 'Update All Senders Boxes settings' and 'Update All Receiver Boxes settings'. Below this is another section titled 'Backup Current Setting and Download CSV Files' with a 'Backup Current Setting' button.

Sender CSV File Format & Parameter Description

Don't change field sequence. First row field name can be changed. Use comma to divide field when saving CSV file.

Field / Parameter	Description	Parameter Value
IP	Sender IP	ie. 169.254.8.105 192.168.1.25
Channel	Assign unique channel number, don't duplicate.	1 ~ 9999
Group	Sender Group name	English, German, French, Latin, Chinese, Japanese, _
Codename	Sender Codename	English, German, French, Latin, Chinese, Japanese, _
Audio Input Select	Select audio input on sender for audio streaming	Parameter value options: hdmi : HDMI audio analog : analog audio auto : auto select (analog first)
Device Control ID	To match Device ID in Device Control CSV File	Number must be match match Device ID in Device Control CSV File
RS232 mode	IP Command Pass-Thru between sender and Receiver	Parameter value options: y : IP Command n : Pass-Thru
RS232 baudrate	RS232 baudrate setting	Parameter value options: 115200/57600/38400/28800/19200/14400/9600/4800/2400/1200/600/300

Receiver CSV File Format & Parameter Description

Don't change field sequence. First row field name can be changed. Use comma to divide field when saving CSV file.

Field / Parameter	Description	Parameter Value
IP	Receiver IP	ie. 169.254.8.105 192.168.1.25
ID	Receiver ID, No duplicate	Number only, start form 1
Group	Receiver Group name	English, German, French, Latin, Chinese, Japanese, _
Codename	Receiver Codename	English, German, French, Latin, Chinese, Japanese, _
Channel	Receiver's Channel	Number only, 0 ~ 9999
Device Control ID	To match Device ID in Device Control CSV File	Number must be match match Device ID in Device Control CSV File
RS232 mode	IP Command Pass-Thru between sender and Receiver	Parameter value options: y : IP Command n : Pass-Thru
RS232 baudrate	RS232 baudrate setting	Parameter value options: 115200/57600/38400/28800/19200/14400/9600/4800/2400/1200/600/300
vw_row	Total row of VideoWall	Number only, start from 1
vw_column	Total column of VideoWall	Number only, start from 1
vw_pos_row	This Display/Receiver's row position in VideoWall	Number only, start from 1
vw_pos_column	This Display/Receiver's column position in VideoWall	Number only, start from 1
vw_OW	Display outer dim. width unit: mm	Number only, start from 1
vw_OH	Display outer dim. height unit: mm	Number only, start from 1
vw_VW	Display viewable area dim. width unit: mm	Number only, start from 1
vw_VH	Display viewable area dim. height unit: mm	Number only, start from 1

Device Control CSV File Format & Parameter Description

Don't change field sequence. First row field name can be changed. Use comma to divide field when saving CSV file.

Field / Parameter	Description	Parameter Value
Device Control ID	Device Control ID for match with Device Control ID in Sender/Receiver CSV file or Setup Tab in AV Master.	Number Only, start from 1
Codename	Device Codename	English, German, French, Latin, Chinese, Japanese, _
command_type	Way to Control the Device	Parameter value options: cec : HDMI CEC ir : IR rs232_hex : RS232 command in HEX code rs232_ascii : RS232 command in Ascii code Notice! PB5000 series support only rs232_hex and rs_ascii command type.
power_on_name	Power On Command Codename	English, German, French, Latin, Chinese, Japanese, _
power_on_cmd	Power On Command	Base on the way to control, and input control command code.
power_off_name	Power Off Command Codename	English, German, French, Latin, Chinese, Japanese, _
power_off_cmd	Power Off Command	Base on the way to control, and input control command code.
cmd1_name	Command 1 codename	English, German, French, Latin, Chinese, Japanese, _
cmd1_cmd	Command 1 command code	Base on the way to control, and input control command code.
cmd2_name	Command 2 codename	English, German, French, Latin, Chinese, Japanese, _
cmd2_cmd	Command 2 command code	Base on the way to control, and input control command code.
cmd3_name	Command 3 codename	English, German, French, Latin, Chinese, Japanese, _
cmd3_cmd	Command 3 command code	Base on the way to control, and input control command code.
cmd4_name	Command 4 codename	English, German, French, Latin, Chinese, Japanese, _
cmd4_cmd	Command 4 command code	Base on the way to control, and input control command code.
cmd5_name	Command 5 codename	English, German, French, Latin, Chinese, Japanese, _
cmd5_cmd	Command 5 command code	Base on the way to control, and input control command code.
cmd6_name	Command 6 codename	English, German, French, Latin, Chinese, Japanese, _
cmd6_cmd	Command 6 command code	Base on the way to control, and input control command code.
cmd7_name	Command 7 codename	English, German, French, Latin, Chinese, Japanese, _

cmd7_cmd	Command 7 command code	Base on the way to control, and input control command code.
cmd8_name	Command 8 codename	English, German, French, Latin, Chinese, Japanese, _
cmd8_cmd	Command 8 command code	Base on the way to control, and input control command code.
cmd9_name	Command 9 codename	English, German, French, Latin, Chinese, Japanese, _
cmd9_cmd	Command 9 command code	Base on the way to control, and input control command code.
cmd10_name	Command 10 codename	English, German, French, Latin, Chinese, Japanese, _
cmd10_cmd	Command 10 command code	Base on the way to control, and input control command code.

RS232 HEX code format:

HEX code format can be any one of below:

- FF010204
- FF 01 02 04
- 0xFF 0x01 0x02 0x04
- 0XFF 0X01 0X02 0X04

D. Multicast

1. Select a video source/sender.
2. Select Display/Receiver want to switch (Multiple choices).
3. Click Apply Button

Video Source Selection:
 0
 CH 1 169.254.0.10 CH 2 169.254.0.11

TV /Display Selection(Multiple Choice):
 MeetingRoom A Living Room TV

Switch	ID	Video	Group	Codename	Video Channel
<input type="checkbox"/>	1		MeetingRoom A	TV1	2
<input type="checkbox"/>	2		Living Room TV	TV2	1

E. Matrix

- Click Switch Button on the cell match the row of Receiver want to switch and the column of target Sender.

Video Source	CH: 1 169.254.0.10	CH: 2 169.254.0.11
TV/Display		
ID: 1 TV1	<input type="button" value="Switch"/>	
ID: 2 TV2		<input type="button" value="Switch"/>

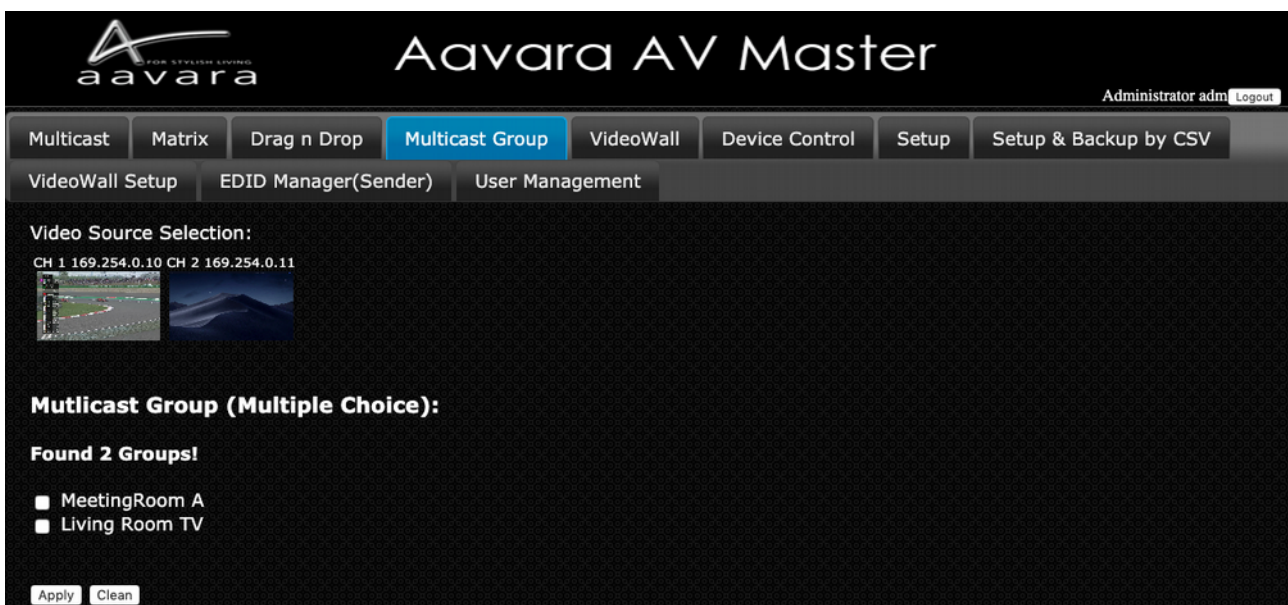

F. Drag n Drop

- Just Drag Video Source Screenshot image and drop on Display Screenshot image to switch target display receiver channel.
- Drag n Drop work with Mouse Cursor w/ PC and Touch panel w/ iPad/Tablet.

G. Multicast Group

1. Select a video source/sender.
2. Select Receiver Group want to switch (Multiple choices).

H. Click Apply Button VideoWall Setup

Step 1 VideoWall Layout / Bezel & Gap Compensation

1. Select VideoWall layout from 2x2
2. Input Outer and Viewable area dimension of display for Bezel & Gap compensation. Unit: mm.

VideoWall Setup

VideoWall Layout: 2x2

VideoWall Bezel & Gap Compensation

Outer Dimension of Display(Unit:mm) Width: 1 Height: 1

Viewable Area Dimension of Display(Unit:mm) Width: 1 Height: 1

Apply

Step 2 Display Position at VideoWall Matching

Once Click on Apply Button of VideoWall layout configuration, a table will show up as VideoWall layout, select right receiver in every cell of table which matched row and column display actual position. For position on VideoWall has no display, select N/A.

After all displays/receivers in video wall being located, Click Apply button.

ViewWall Tab will change base on VideoWall layout input and ready to operate.

VideoWall Setup

VideoWall Layout: 2x2

VideoWall Bezel & Gap Compensation

Outer Dimension of Display(Unit:mm) Width: 1 Height: 1

Viewable Area Dimension of Display(Unit:mm) Width: 1 Height: 1

Apply

	1	2
1	1 : 169.254.0.12	2 : 169.254.0.13
2	N/A	N/A

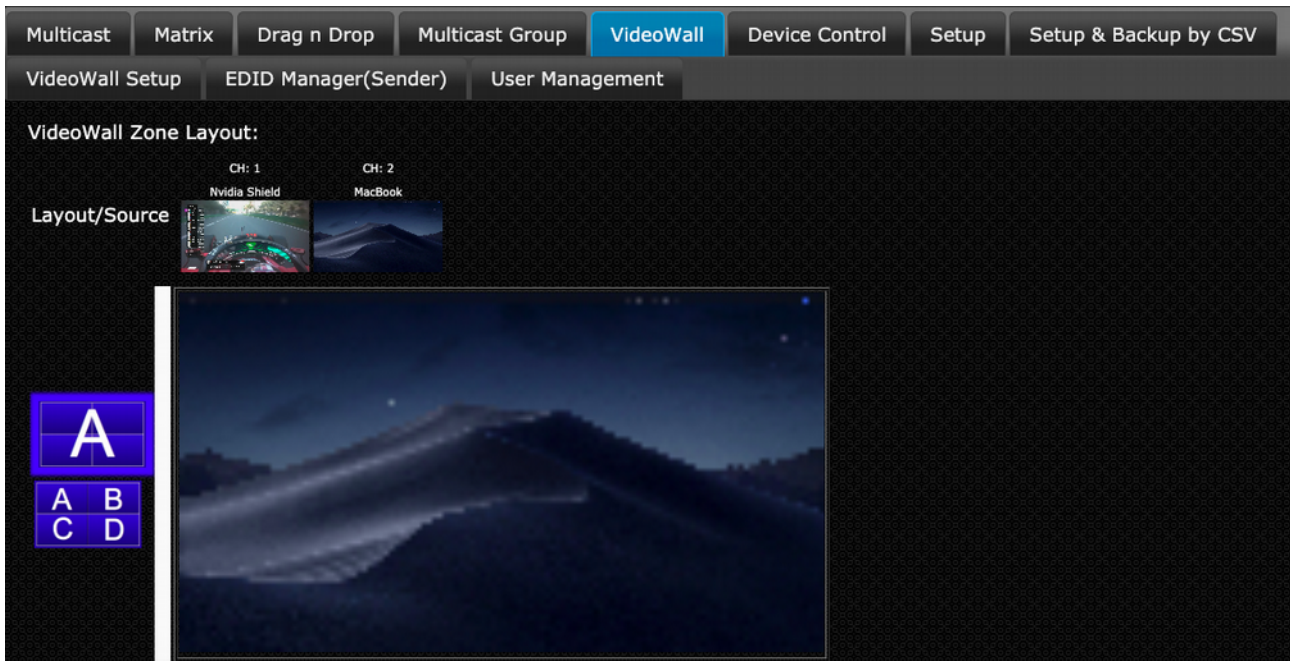

Apply Videowall Layout Setting

I. VideoWall

Once ViewWall Setup completed in VW Setup Tab, VideoWall Tab will show right VideoWall layout selection.

1. Select one of VideoWall Zone Layout selection at first left Column.
2. Select Video channel at Top Row.
3. Drag the Video Source Screenshot image and drop on the Videowall Zone you like to show.

VideoWall will show layout and video channel you selected.

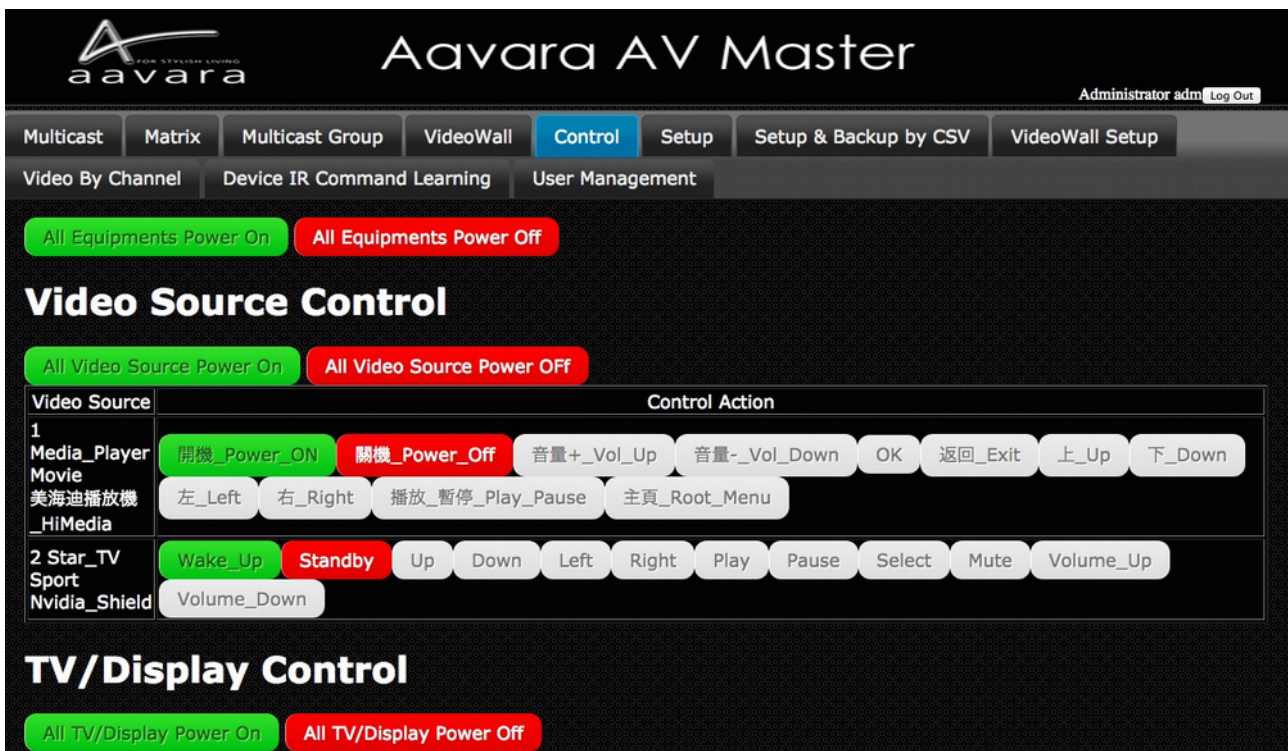

J. Control

Aavara AV Master Web can control external devices like TV/Display/Projector & Video Source Device by CEC(via HDMI connection), RS232 and IR. Please edit and upload Device Control CSV file and set Device Control ID to each sender and receiver, AV Master will bring in all control command buttons of that device.

Notice! PB5000/PB7000 series support only RS232 IP commands type. PB9000 series will support RS232, IR, and CEC command type.

Click on the button of control action wanted, control command will send out to target external device immediately.

K. EDID Manager (Only Available on Sender)

Copy Display EDID to Sender

Ensure that target display/receiver got HDMI connection between display and receiver, network connection between sender and receiver, and sender/receiver at same video channel, before Copy Display EDID to sender action.

- To improve EDID compatibility, add HDR and multi-channel audio support, options as follow:
 - Copy Display EDID w/o any change (Default)
 - Video no change, All Audio Formats
 - 1080p HDR w/ All Audio Formats
 - 1080p HDR Audio format no change
- Select Display/Receiver like to copy EDID from
- Click Apply button
- Display EDID will be copy, send to sender at same channel with receiver, and save at sender. Sender will use this EDID to do EDID handshake with Video Source Device.

The screenshot displays the Aavara AV Master web interface. At the top, the logo for Aavara is on the left, and the text 'Aavara AV Master' is in the center. On the right, it shows 'Administrator adm' and a 'Log Out' button. Below the header is a navigation menu with tabs: Multicast, Matrix, Multicast Group, VideoWall, Control, Setup, Setup & Backup by CSV, and VideoWall Setup. The 'EDID Manager' tab is selected and highlighted in blue. Below the navigation menu, there are three sub-tabs: 'EDID Manager', 'Device IR Command Learning', and 'User Management'. The main content area is titled 'EDID Manager' and contains the following sections:

- Copy Display EDID to Sender :**

Please ensure the sender and receiver are at same channel, display connected to receiver with HDMI.

 - Select Video and Audio format wanted: Copy Display Video/Audio EDID no change (Default) [dropdown arrow]
 - Select Display/Receiver like to copy EDID from: undefined : Signage_Display [dropdown arrow]

[Apply button]
- Upload Customized EDID Bin file to Sender:**

Select EDID Bin file : [Choose File] No file chosen [Upload button]
- Reset EDID :**

Reset EDID to Factory Default : [Reset EDID button]

Assign Specific Resolution/Timing EDID to Sender

Notice! This functions only support by PB9000 series model. PB5000 and PB7000 series models doesn't support this.

Select and assign Specific Resolution/Timing EDID to Sender for handshake with Video Source device for solving EDID compatible issue or allow video source output video/audio format as assigned.

1. Select Video Format
2. click Apply Button
3. Recommend to have HDMI unplug n plug-in between video source and sender for good EDID handshake.

Upload Customized EDID Bin file to SenderEdit customize EDID Bin with EDID editor(not included), then upload to sender. Sender will use customized EDID table to handshake with Video Source device for solving EDID compatible issue or allow video source output video/audio format as assigned.

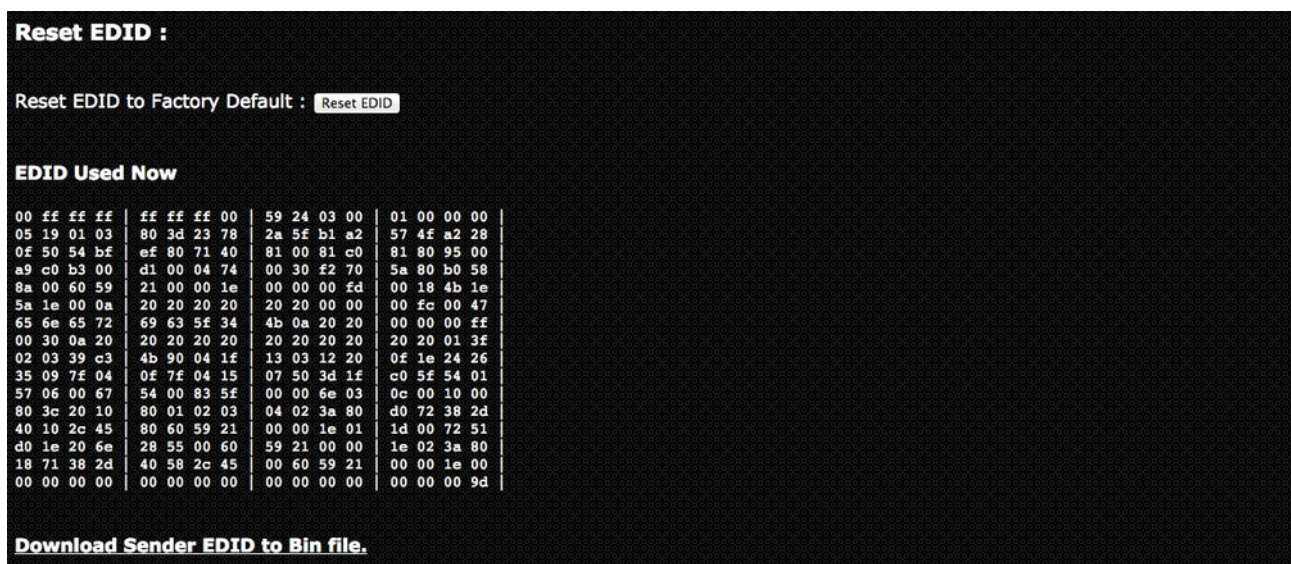

1. Use any EDID edit software to customize EDID table and save as standard EDID BIN file.
2. Go **EDID MGR** tab.
3. select customized EDID bin file and Click Upload button.
4. **Once Customize EDID BIN file upload complete, please check the HEX code of EDID used whether it changed and same as customize EDID table.**

Reset EDID to default

Just click on Reset EDID to Default Button, then Sender EDID table with reset to default one.

Download Current EDID

Just click on Reset EDID to Default Button, then Sender EDID table with reset to default one.

L. User Management

User Management Tab

User Management

3 Users Found!
